### **PROJECTS**

#### **Title: E-Learning (Engineering)**

##### **Description:**

In this Project, we provide information about various subjects from student convenience. All these subjects are explained in Pdfs, Tutorial format with relative MCQs and many more. Project was made on PHP platform

#### **Title: A Model to Measure Credibility of Information on Social Platform**

##### **Description:**

In this project, I have developed a web based chat application, which includes sign in, login, user and admin pages. Also created a chat box to post any news on it. The news will be first declare as undefined, if the news is new to previous database and admin panel will segregate the tweets basis of originality. If any news is posted on chat box, this will first compare with database , if there is any relevant information found the news will auto segregate.
